

BENEFITS

Tracking

The Fixed Assets Service add on for Dynamics SL allows tracking of scheduled and unplanned maintenance on Assets entered in the PCL Fixed Assets module.

Service Types

User defined (Oil change, Tire rotation, etc.). Unlimited number of service types.

Service Schedules

For each Asset/type Daily, weekly, monthly, semi monthly, quarterly, semiannual, annual, biannual and custom. Schedule by asset or service type.

Service History

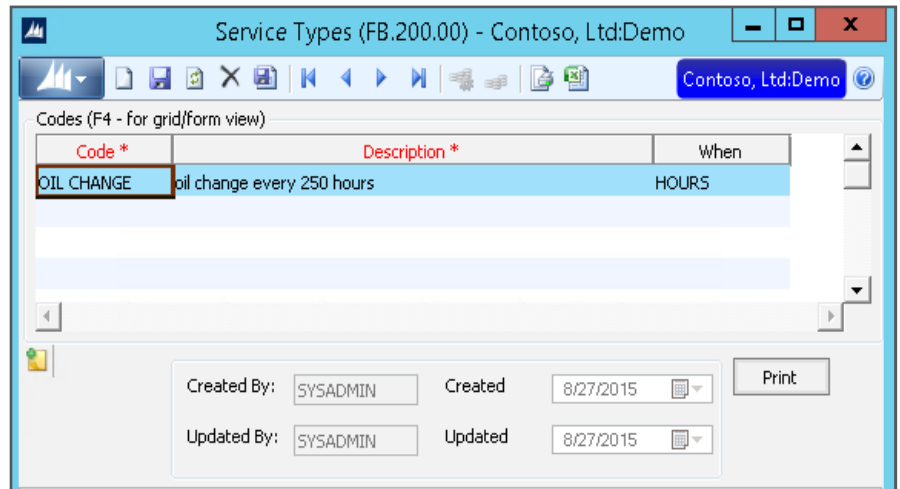

Allows you to view or enter all service history information for an individual asset. This includes the date last serviced, where the service took place, the cost of the service, the vendor ID who performed the service, and the next service date.

Reporting

Service schedule by Asset/Type/Date. Service history by Asset/Type/Date. Service cost by Asset/Type/Date.

Improve Reliability of equipment by tracking service and maintenance of vehicles and equipment.

PCL Fixed Assets Service allows a user to add as many service types as they would like.
