

Continuous Monitoring Solution Offering Superior Performance and Key Reports that Auditors Demand

With superior performance and configurability, Fastpath Audit Trail is an easy-to-install and configure solution that will allow you to analyze changes to your Microsoft Dynamics® transaction and master data. With only a few clicks, you can understand what data has been changed, who changed it and the before and after values.

Features

- Track changes made from within Microsoft Dynamics and external sources
- Capture before/after values, including items that have been deleted
- Monitor Microsoft SQL Server schema changes
- Extensive list of audit trail templates included with the tool
- Quick implementation that offers rapid return on investment
- Best-in-class performance and reporting for Microsoft Dynamics

Product Benefits

Immediate ROI

Audit Trail is easy to install, configure and use. Within just hours of set-up, you will be able to easily track changes to your system including: who, what, when, and to/from.

Actionable Information

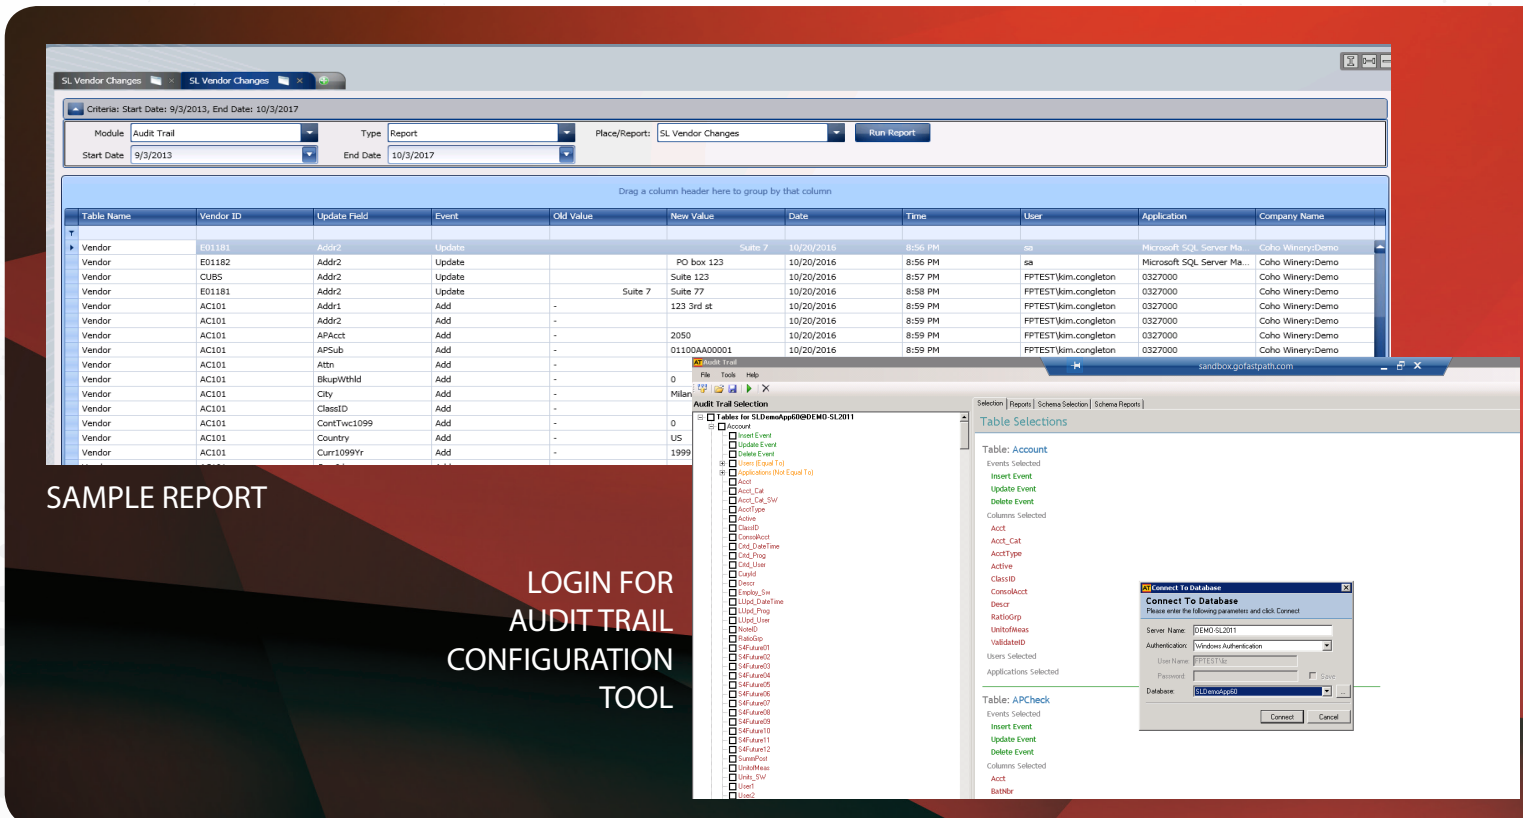

Obtain useful data from your system that previously was unavailable. Get all the information you need to make informed decisions.

Seamless Performance

Works seamlessly with Microsoft Dynamics with minimal system impact.

Unlimited Flexibility

No matter the need, you can quickly configure custom or standard reports for quick analysis.

SAMPLE REPORT

Table Name	Vendor ID	Update Field	Event	Old Value	New Value	Date	Time	User	Application	Company Name
