BENEFITS

⊙ Great search capacities

Search for items in Dynamics SL using multiple and partial search criteria in an easy to use interface. Results are displayed in view grid format with drill down, print and export capabilities.

⊙ Put your information to work

Easily access and make changes to your data. Search for documents and transactions while using the six operators available for refining your search.

⊙ Find the information you need

Quick Finds are available for the following modules: Accounts Payable, Accounts Receivable, Bill of Materials, Fixed Assets, General Ledger, Inventory, Project Controller, Purchasing/PO Requisitions, and Work Order.

⊙ Utilize the power of Operations

Empower your business by using the power of the Operators on the Search screen. Fields will change colors based on the Operator used in that field. Results are displayed in the Search Results screen, and can either be printed or viewed using the appropriate Dynamics SL screen using Drill down.

⊙ New Feature added to AR, AP, GL and Project

Export your data to an Excel Pivot Table.

Improve efficiency for your business by tracking, analyzing and utilizing search criteria from within Dynamics SL.

Quick Find simplifies the process of entering, searching, and viewing account information in different modules.
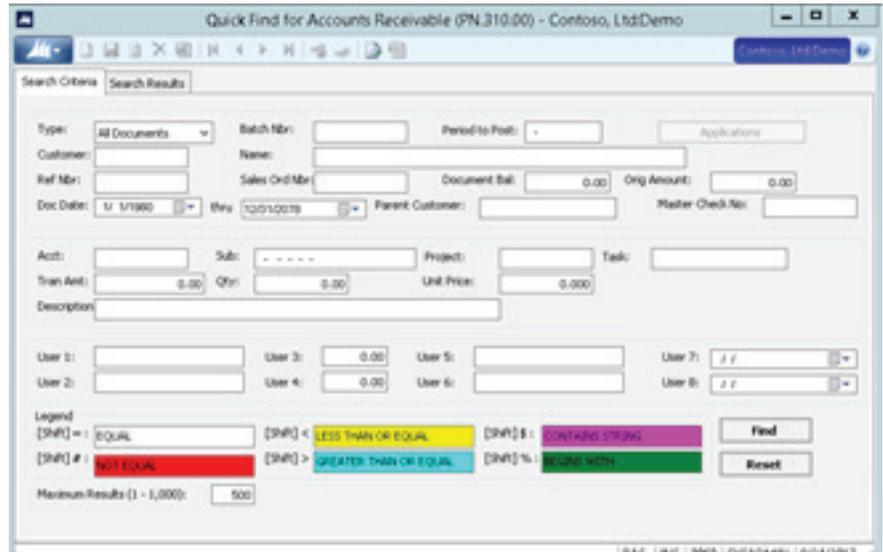

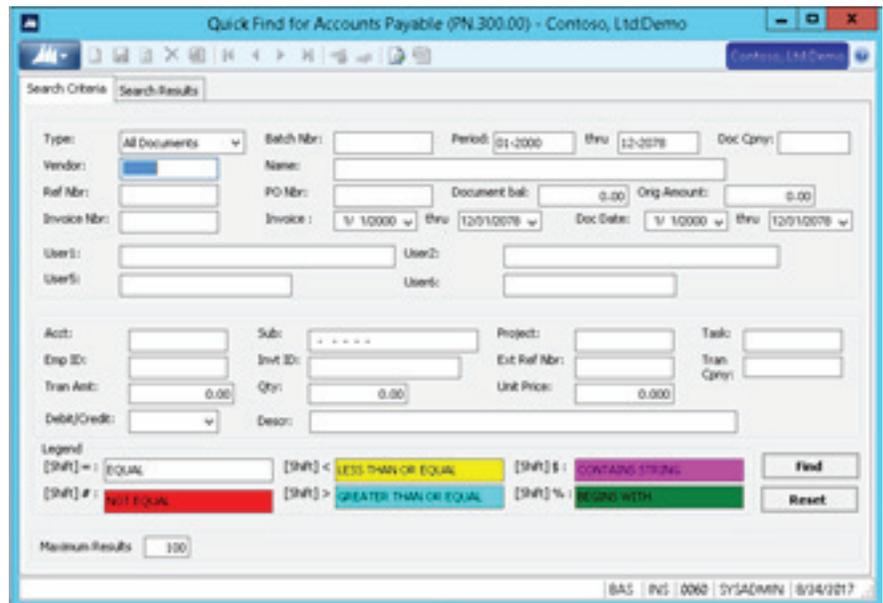

Search Criteria on multiple fields at one time.

Module packages:

Core 4 (AP, AR, GL & Project): $1595.00
All Searches: $1995.00

PLUMBLINE
Consulting LLC

Accounts Payable Search	Search for AP Vouchers, Memos and Checks. Vouchers also reflect check payments for easier record of what has been paid.
Accounts Receivable Search	Search for AR Invoices, Memos and Deposits. Search date ranges, partial matches and more.
Bill of Material Search	Find Bill of Materials documents by header of detail Information.
Customer Search	Search for AR Customers. Add our search button with customization manager to any AR Screen to use the search from any screen.
General Ledger Search	Locate batches and Journal entries in General Ledger. Fields to search include batch number, module, description, reference number and many more.
Inventory Search	Find Inventory transactions quickly. Search by item attributes or by transaction information.
Purchase Order Search	Locate Purchase Orders by searching for item details, vendor or purchase order information.
Sales Order Search	Search for orders within a range, based on customer or order information.
Vendor Search	Find vendors easily. Search by name, address, phone and other vendor fields. Find all Vendors with common characteristics. Add our search button with customization manager to any AR Screen to use the search from any screen.
